

Euroluca, Salone del Mobile

**Sammode puts its new
tubular luminaires on display**

Sammode

**18 April 2023
Press release**

Sammode will display its new tubular luminaires at the EuroLuce fair in Milan on 18 - 23 April 2023. These models were designed by Éloi Chafai and Jean-François Dingjian from Normal Studio, building on the firm's heritage and its emblematic tubes.

The tube range has grown this year, with new sizes and specific functions. New luminaire models are now available, offering an endless range of options. Sammode has something for every type of use and every configuration.

Paname Nano

Let's check out the Paname collection... I'm here for the Nano version! Paname Nano luminaires were designed by Normal Studio and inspired by Paris, nicknamed the town of light. Choose from the many louvre patterns with stylish finishes and materials. An XS version is now available. These luminaires are designed for use either indoors—in a corridor, entrance hall or bedroom—or outdoors, e.g. on a patio.

Technical data

Belleville Nano	Black (coal) or Stainless steel
Monceau Nano	Black (coal)
Vendôme Nano	Brass
Dimensions	L 300 x Ø 70 mm

Floor lamp

The Sammode Studio range has one all-new addition, a floor lamp range, also designed by Normal Studio. This new version incorporates the brand's iconic tubular luminaires. With its built-in switch, the first ever floor lamp in this range will be right at home in any interior design. This tube model can be added anywhere and used for any application.

These lamps are secured to the ground as part of a black metal structure. The Belleville, Monceau and Vendôme models stand 1.55 m high, while two heights are available for the Elgar, 1.20 m and 85 cm, bringing class and style to stand-out interior decors. All of these emblematic floor lamps come with a dimmer switch. Opt for a splashy or tranquil style with a range of louvre colours to match the time of day.

Vendôme Floor lamp

Finish	Brass finish
Front bulb lighting	
Dimmer	Cable-mounted dimmer switch
Dimensions	L 1550 x Ø 400 mm

Monceau Floor lamp

Finish	Black finish
Front bulb lighting

Belleville Floor lamp - 360° lighting!

Black finish	
360° lighting	
Dimmer	Cable-mounted dimmer switch
Dimensions	L 1550 x Ø 400 mm

Elgar Floor lamp

Finishes	copper finish or brass finish
Dimmer	Built-in dimmer switch
Dimensions	L 1200 x Ø 240 mm and L 850 x Ø 300 mm

Luminaires are lighting up!

Sammode is launching a new type of luminaire, and a rather revolutionary type at that, a suspended light fitting comprising 5 vertically-mounted tubes, available in two dimensions: diameters of 1 m or 1.5 m. This large-scale model comprising Belleville tubes for the Paname collection, or the iconic Musset GR model, takes a leaf out of the Sammode industrial book, intended for professional applications, while luminaire structures from the 1970's make a comeback. Hotels, restaurants, offices and architectural projects in general can benefit from the expertise of the French manufacturer.

Technical data + visuals removed

Belleville luminaire

Colour	black
Dimensions	Ø 850 mm

Musset GR luminaire

Finishes	black (coal) and brass
Dimensions	Ø 850 mm

An original headboard

The timeless Elgar wall light is now available in XS format. This model now comes with some all-new features: a push button and a bedroom plug. This light is ideal for headboards, diffusing a mellow light while you relax and read or rest..

Elgar Plug & Play

Finishes	Silver, Copper, Brass or Petrol
Dimmer	Built-in dimmer switch
Dimensions	L 450 x Ø 70 mm

New bathroom applications

Sammode also sells smaller and very low voltage versions of its traditional models, which can be fitted in bathrooms, including one volume 1 model, which is compatible with use near to a water source. Whether you opt for the Elgar, Purcell or Mondrian models, you are guaranteed a diffuse and pleasant light, with a pretty halo which looks great next to a bathroom mirror. Outside of the bathroom, some of these models can also be installed as vertical or horizontal wall lights, as ceiling lights, or even as suspended light fittings, next to a door to light up an entrance, or at intervals along a corridor . . .

Elgar

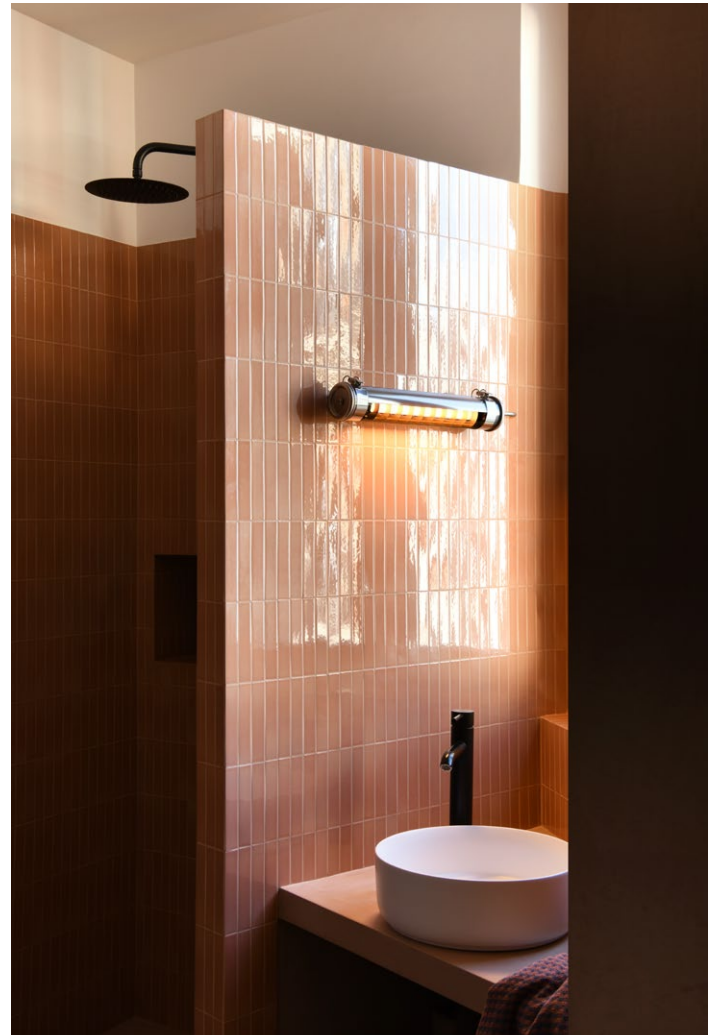

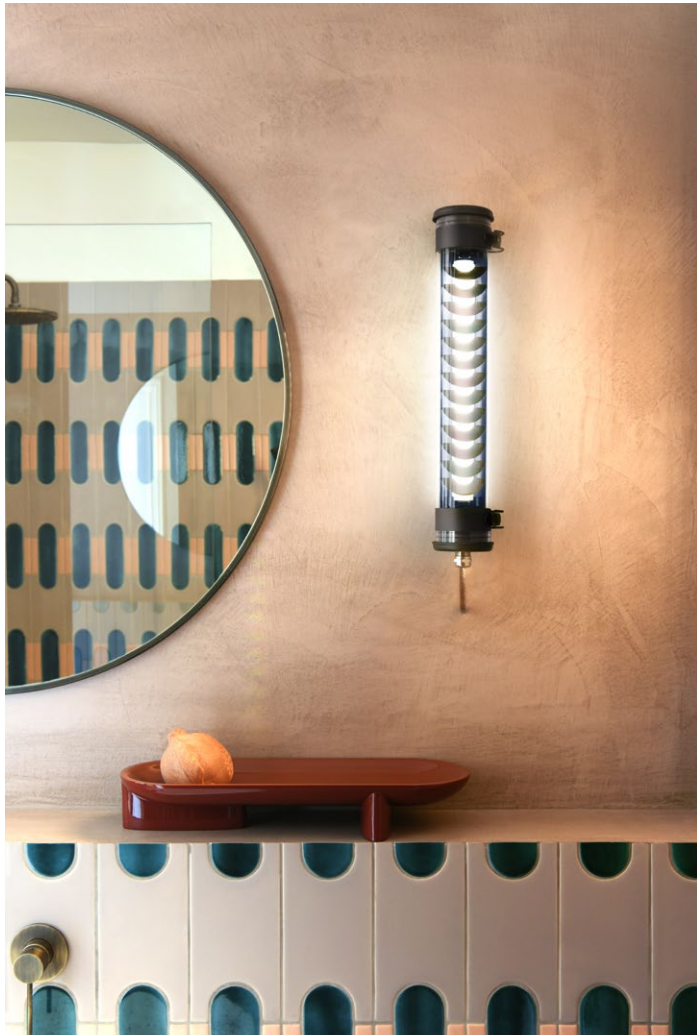

Finishes	Silver, Copper, Brass or Petrol
Dimensions	L 450 x Ø 70 mm

Purcell

Finishes	Silver, Copper, Brass or Petrol
Dimensions	L 450 x Ø 70 mm

Mondrian - For an extra small diameter!

Finishes	Stainless steel or coal
Dimensions	L 700 x Ø 40 mm

About Sammode

Sammode, a quality luminaire manufacturer, makes all its products in France and has promoted three of its fundamental values for almost a century: relevance, reliability and durability.

Sammode was founded in Châtillon-sur-Saône (Vosges, eastern France) in 1927, and is a family business that designs lighting solutions for industry and architecture and now rightfully sets standards in these fields. The main characteristics of Sammode lighting solutions are robustness, impermeability, durability, reliability and adaptability.

The Sammode Studio collections comprise a range of original and authentic pieces designed for household use in apartments and villas, retail outlets and offices and hotels and restaurants. Indoor and outdoor lighting solutions.
